General Practice & Monash Smiles Centre provides health care at the right time and in the right place

The official opening of Glen Waverley General Practice and Monash Smiles during last week's celebrations at The Glen, provided a chance to reveal Link HC's newest service which will provide accessible and affordable healthcare to the community

On Thursday 19th October, VIP guests including the Mayor of Monash Cr Rebecca Patterson helped to officially open the Glen Waverley General Practice and Monash Smiles centre now based at The Glen.

The Glen Waverley General Practice is open seven days a week and late on Thursday and Friday evenings, with bulk billing and reduced rates available for eligible patients. Being collocated within Priceline Pharmacy and onsite pathology, provides patients with one place to access their health needs.

Monash Smiles is helping the community with their smile, by offering specialist orthodontist and dental prosthetist. Our specialist orthodontist can help correctly align teeth, bites and jaws including straightening teeth, whilst our specialist prosthetist can provide and repair dentures as well as mouth guards and sleeping splints to help protect children's smile.

"This centre which combines both dental and GP services is an example of Link HC's commitment to accessible services by providing essential primary healthcare at the right time and place," says Philip Moran, CEO of Link HC. "Parents are able to see our doctor or dental experts and do their grocery shopping at the same time."
