

# THREE SIDES OF THE COIN PROJECT

*Using theatre to create change*

**Let's talk  
about the impact of  
gambling on our community**

**Hear from people with personal  
experience of gambling harm  
and recovery**

Enliven your next meeting/event/professional development session with a one hour Zoom session with:

- live 8-min theatrical monologue by someone who has been harmed by gambling (either their own or a love one's)
- Screening of two 6-min videos of people's journey into and recovery from gambling addiction (enacted by the people who have been there themselves – with the addition of music and animation)
- QandA with lived experience advocated + discussion

This is a dynamic way to stimulate and challenge conversations about the impact of gambling harm and an opportunity to understand gambling as a public health issue.
